

KQ SERIES MODULAR ICE CUBE HEADS

The KQ Series solid ice cube maker with a vertically mounted evaporator are entirely made of stainless steel. They are characterized by their innovative, linear design and high reliability.

The ice is produced using a continuous stream of water which flows downwards and is uniformly distributed across a highly efficient vertical evaporator.

With their superior cooling performance and low production costs, solid square cubes offer the best solution for all situations where high ice consumption is needed.

Features

- Full stainless steel body
- Electronically controlled
- Technical support
- Machines from 150-2,000kg available

10gm crystal clear hard ice cube

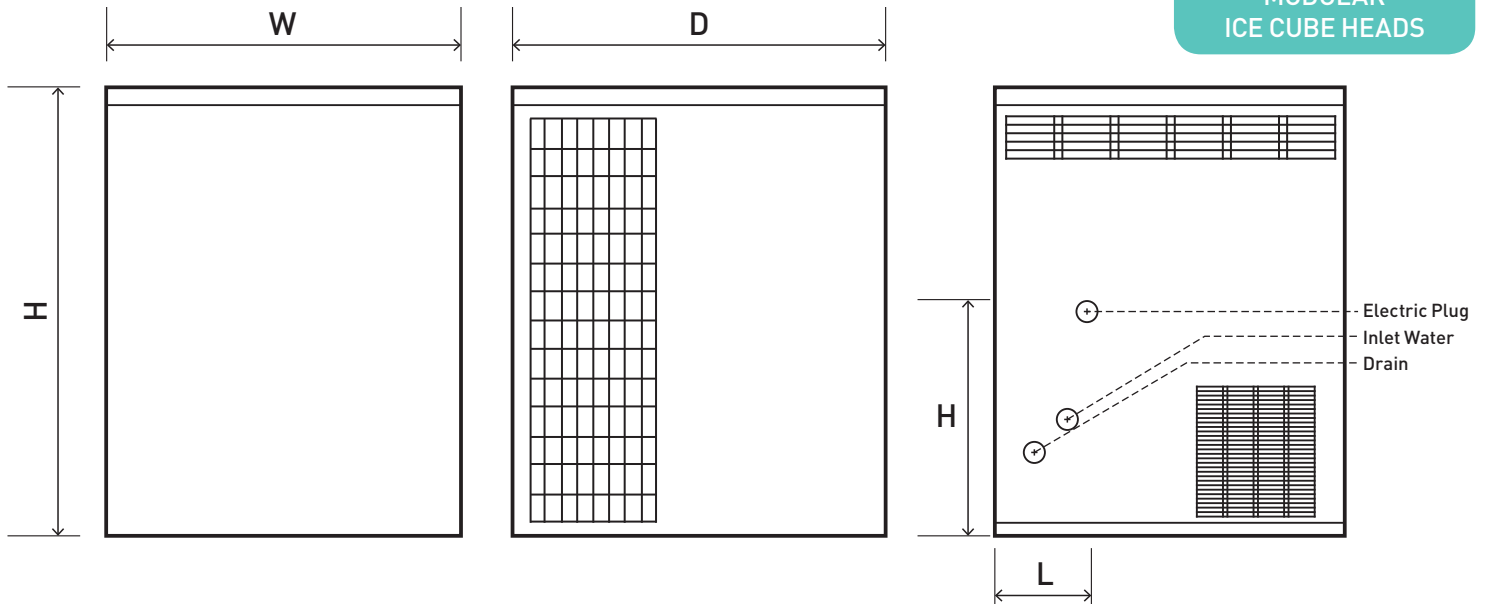

Manufactured in Italy

Energy efficient
