

S SERIES GRANULAR ICE

GRANULAR ICE: This vertical evaporator ice machine produces flaked granular ice at a temperature of -0.5°C using fresh water. The range includes models from 130kg - 6,000kg / 24 hours.

The ice is already crushed and ready to be used. Ideal for quick cooling of bottles and cocktails and for display or transportation of fish, meat and vegetables. Also suitable for supermarkets, hospitals, bakeries and laboratories.

This kind of ice is ready to use and does not require any crushing and can be used directly onto fish, meat and vegetables.

PLC programmable logic controller to protect the evaporator against any mechanical stress on the evaporator and motor gearbox assembly.

Sub zero flake ice models available

Features

- Stainless steel shell with rounded corners
- Vertical evaporator
- PLC controlled
- Visual indicators for LP, HP, low water and gearmotor protection
- Split system models available

Models from 90-6,000kg
Produces granular ice at -0.5°C

Manufactured in Italy

Ideal for display, service,
conservation and transportation
of fish, meat and vegetable
