

## C SERIES SELF CONTAINED ICE CUBE MAKER

Entirely made of stainless steel, the C series solid ice cube makers from Kastel are a premium product and incorporate all the latest technology to ensure the highest efficiency and a long service life.

The ice is produced by spraying water on a horizontally mounted copper evaporator which freezes and forms high density, crystal clear ice cubes.

Purer than the water from which they are made, solid crystal clear cubes are the best option for all those situations where we need to keep drinks cool for a long period of time without watering them down.

**BACK COUNTER MACHINES:** These medium sized free standing ice machines can be fitted in most work areas, and are advantageous when a greater amount of ice is needed in a shorter period of time.

The stainless steel construction is built strong for demanding environments and is elegant in design. Ice Machine Solutions' range of Kastel ice makers are also available with electronic boards or mechanical timers. All models are for 'tropical use' where they can produce ice even at room temperatures of 43°C and water temperature of 35°C.

### Features

- Full stainless steel shell and door
- Available in electronic or mechanical
- Technical support available
- Spare parts for most makes and models

**18gm full crystal clear hard  
ice cube**

**Manufactured in Italy**

**Energy efficient**

**Stainless steel body and door**
