

C SERIES SELF CONTAINED ICE CUBE MAKER

Entirely made of stainless steel, the C Series solid ice cube makers from Kastel are a premium product and incorporate all the latest technology to ensure the highest efficiency and a long service life.

The ice is produced by spraying water on a horizontally mounted copper evaporator which freezes and forms high density, crystal clear ice cubes.

Purer than the water from which they are made, solid crystal clear cubes are the best option for all those situations where we need to keep drinks cool for a long period of time without watering them down.

UNDERCOUNTER: These small 'universal' machines are perfect for all uses from residential to commercial, for the low daily consumption of ice. Production can be controlled by an electronic board or a mechanical timer reducing the costs of maintenance.

External parts of the housing can be easily removed for fast servicing, door can be easily removed for the quick cleaning of internal parts. Both models are made for 'tropical' use and can even produce ice at room temperatures of 43°C and water temperatures of 38°C.

Features

- Full stainless steel shell
- Electro Mechanical Operation
- Technical support available
- Spare parts for most makes and models

18gm full crystal clear hard
ice cube

Manufactured in Italy
